SUMMARY

Data-driven Technical Solutions Engineer at a startup with experience building automated data pipelines, analyzing and validating complex datasets, and delivering actionable insights through reporting and dashboards. Strong Python and SQL background with cloud experience on AWS, collaborating cross-functionally to translate business needs into scalable, data-informed solutions.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, SQL, HTML

Libraries/Frameworks: React.js, Node.js, Pandas, NumPy, Scikit-learn, Torch

Databases/Query languages: MySQL, MongoDB, SQLite

Tools/platforms: Git, AWS, Docker, Postman, Terraform, GitHub Actions, CI/CD pipelines, AWS IAM Policies, Redshift Spectrum, Unix/Linux

EDUCATION

Wilfrid Laurier University

B.Sc in Computer Science - Big Data Systems Concentration, Economics Minor

Waterloo, ON

Apr 2025

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- Hashicorp Certified Terraform Associate
- AWS Certified Cloud Practitioner

WORK EXPERIENCE

Varix Solutions

Technical Solutions Engineer

Remote

April 2025 - Present

- Delivered end-to-end technical solutions for small business clients, spanning customer-facing platforms and backend data systems.
- Built and supported cloud-based integrations and automated data pipelines, enabling reporting and analysis of transactional and market data.
- Deployed and maintained secure cloud infrastructure (AWS), implementing environment-based configuration and IAM best practices.
- Collaborated with product, business, and client stakeholders to translate operational needs into scalable, production-ready systems.

Independent Contract (via FieldNation)

IT Infrastructure Assistant

Toronto, ON

May 2023 - Aug 2023

- Supported multi-floor commercial network deployments for enterprise clients under senior IT engineers
- Installed and configured 20+ routers/switches, ensuring secure connectivity and system reliability.
- Conducted troubleshooting using Wireshark and CLI tools, achieving a 25% reduction in deployment time.
- Collaborated cross-functionally to test, integrate, and document system configurations

McDonald's

Maintenance

Milton, ON

Jan 2018 - Present

- Maintained a strong attendance record over 8 years, demonstrating exceptional reliability and time management while completing a full-time Computer Science degree

RELEVANT PROJECTS

Full Serverless Portfolio Website – AWS CloudFront, S3, Lambda, API Gateway, SES, Terraform, GitHub Actions

Terraform, GitHub Actions, Lambda (Python), S3, CloudFront, API Gateway, SES, IAM, Route 53

- Built a fully serverless portfolio website using AWS S3 + CloudFront with HTTPS and custom domain routing.
- Provisioned infrastructure with Terraform (S3 bucket, CloudFront distribution, DNS, bucket policies).
- Implemented a secure backend contact form using Lambda (Python) + API Gateway with SES transactional email.

Data Engineering Project – Arsenal Stats ETL (AWS)

AWS, PySpark, Redshift serverless, Lake formation, IAM, S3

- Designed and deployed a data engineering pipeline for sports analytics using AWS services.
- Managed IAM roles, S3 storage, and Redshift Spectrum queries for secure and scalable data access.
- Deployed and tested infrastructure locally using Linux-based development environments.

NYC Taxi Big Data Analysis

Apache Spark, Data Bricks, SQL

- Developed data processing and visualization pipelines in Spark to analyze large-scale transportation datasets.
- Built and tuned ML models for fare prediction and trip classification, improving inference accuracy.
